EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

IN THE TITLE

The title has been changed to be reflective of the claimed invention. The title now reads:

--METHOD AND TOOL OF TUNGSTEN/HEAVY METAL ALLOY FOR HOT-FORGING SOLID STATE COPPER AND COPPER ALLOYS--

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: One reason for allowance is that the claimed tool is for receiving in the solid state copper or copper alloy and the tool is made of a specific material. Thus, the tool is of a construction or type that operates on solid-state copper/copper alloys, which would exclude their applicability to molten copper/copper alloys. This is an important distinction because of the different problems associated with tools that work on molten material and tools that work on solid-state material. The advantage of applicant's specific tool and tool material combination is that the tool resists the formation of grooves produced during hot forming of the material in its solid state thereby resulting in the prolongation of the life of the tool within this particular field of endeavor.

Art Unit: 3725

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
